DAYTONA is situated upon the east bank of the Halifax River at its fairest expanse and midway between the source at Buoy Bay and its outlet at Mosquito Inlet. It is in latitude 30° twenty-four miles from St. Augustine and one mile from the Atlantic Ocean, and is acknowledged to be without a rival for beauty among the cities of the south. Its site is level, flat, and that was created by the most rapid growth of majestic forest trees, and among these trees is the town of today, with its beautiful cottages and well graded and paved streets. The result is that along the wide avenues that connect the town are lovely live and evergreen and blossoming, many of them displaying graceful boughs of the long Spanish moss, that overhangs the street and walls, and among these are interspersed tall tropical palms, glossy leaved magnolias, fragrant bay and corall-beaded holly, and many other varieties, while in many places the wild grape, the trumpet vine and the amorphia climb and cling among the branches forming shady bower and adding grace and beauty.

The town lies parallel with the Halifax River, and extends for nearly two miles along the shore. This river is the delight of the angler and the yachtsman and forms one of the town's greatest attractions.

The main avenues that run parallel with or intersect the river are all 100 feet wide, except Beach street, which is about sixty-five feet, but has a half-mile of open, beautiful water abutting upon its eastern side, where the salt waves ebb and flow and along and across which comes the cooling, invigorating and health-giving breeze from off the wide Atlantic, which temper and render the Halifax climate one of the most perfect in the world. Daytona has many miles of well-graded, paved and shelled roads and streets, rendering it the

Wheelman's Paradise

and added to these, but a mile away, are thirty miles of smooth, hard beach, that affords an unrivaled course for long-distance cycling and driving or automobile racing. No town of equal size, North or South, numbers so many wheelmen, and cycling is a favorite pastime with the tourists summer and winter.

The Beautiful Cottages

that have been erected in the past years and are being built are rendering Daytona as famous for its fine homes as for its beautiful river, trees and avenues, and they are adding yearly to its attractions.

Not the least of these attractions to those securing homes in the South, and ranking second only to healthfulness and perfection of climate, is the fact that its population is chiefly composed of cultivated and intelligent people accustomed to the refinements of home and social life. Added to these features are good churches, good public and private schools, stores, hotels, laundry, meat markets, novelty works, an opera house, electric lights for street and house illumination, a good telephone system, ice factory, Lily Water Works, hot and cold baths, etc., and everything else can be procured that is necessary to make life comfortable. An important feature in the healthfulness of this town is the

Water Supply

which is derived from numerous flowing wells, of which there are probably 300 in the corporate limits. This flow is secured by boring wells to the depth of from 80 to 120 feet, passing through several strata of rock, and thus depth assures purity from all surface contamination. The water is slightly impregnated with magnesia and iron, and holds sulphur in the shape of gas, which soon passes away.

The **Population of Daytona** proper is about 1,800. Added to this is a suburban population on main shore and peninsula of about 1,000 at Kingston, Blake, Old Seabreeze or Goodall, Seabreeze and Silver Beach,

which are properly a part of the town and population.

Daytona Beach

lies one mile east of the town. It is approached by three good bridges over the river and well-graded avenues, and is the principal summer resort south of St. Augustine. It has more tourists during the summer than all other places south of that city combined, and is also becoming a favorite winter resort. The beach is wide, firm and smooth, by many considered the finest in the world, and the surf bathing is safe and excellent summer and winter. People who have tried Northern and Western summer resorts declare that there are none so perfect in comfort as Daytona beach.

Automobile Race Meet.

The Florida East Coast Automobile Association conducts an annual race meet on the beach, which has now a universal reputation as the greatest automobile race course in the world. The Daytona-Ormond Beach is hard macadam and an ideal stretch of thirty or more miles without a break makes it the natural racing ground for America.

At low tide the beach is bare for 300 feet and neither carriage wheel, bicycle or pedestrian can make a hardly visible imprint on the smooth and well-packed sand. It is no uncommon sight to see sail-rigged yachts speeding with the velocity of the wind before a stiff breeze along the smooth beach, thus affording the most exhilarating sport known to man. Besides these, miles of hard-shelled-palm fringed boulevards bring the favors of the wheel and vehicles into direct touch with the mainland over the broad bridges which span the splendid Halifax River.

The beach from the sandy bluffs to the lowest point at Ormond, measures about 500 feet, and the average depth of the surf measures about two feet. A continuous gentle swell rolls in from the ocean from one to two feet in depth under normal conditions, making the beach an attractive and also a safe place for surfing. Here the infant as well as the grey-haired veteran of many summers, can safely enjoy the luxury of a sea bath throughout the larger part of the year, while the strong and expert swimmer can venture out further to test his strength and skill in battling with the inexhaustible powers of the mighty ocean.

The Peninsula

lying between river and ocean is one-half mile wide, and is being rapidly improved, and there are many fine cottages and several good hotels, an opera house, two ocean piers, beach pavilion and a large casino.

A Remarkable Feature

at Daytona has been the yearly improvement in the style and value of the buildings that are being erected for homes. Men of capital of the North and West have become awakened to its advantages for winter residences, and valuable lots are being purchased and costly houses, beautiful in design and finish, are being erected, and beautiful homes, the abodes of wealth and culture are multiplying.

Seabreeze (City Beautiful) and Goodall are settlements on the ocean side of the peninsula across the Halifax River from Daytona.

At the foot of Ocean Boulevard, Seabreeze, a pier reaches 600 feet across the beach into the swelling surf of the ocean. This pier is a favorite resort of those who delight in the sport of fishing. The surf here abounds in trout, pompano, yellowtail, cavalle, whiting, drum, sheepshead and many other varieties of edible fish. During the fall season the famous sea bass affords royal sport, and it has been no uncommon occurrence to land a thousand pounds of this gamey fish in an afternoon, individuals of them ranging from fifteen to thirty-five pounds in weight. Not only does the ocean offer this splendid sport but the Halifax River, only half a mile back of the ocean, is equally famous for its fine fishing, and the varieties that abound in the ocean are present in the river.

Hunting and fishing good. Experienced guides and dogs may be had at reasonable prices.

Steamer "CHEROKEE" starting Jan. 25.

FOR THE TOMOKA RIVER, Mondays, Wednesdays and Fridays, leaving Conrad's dock opposite bank at 9:00 a.m., middle bridge 9:15; peninsula bridge 9:30 and Ormond at 10.
